|---|---|---|---|
| 24 | Coventry University Apprenticeships | We work with employers to provide tailored Higher and Degree Apprenticeships at Level 4 and above. Apprentices work full time for their employer, with 20% of their work time allocated to off-the-job training. They gain academic qualifications awarded by Coventry University in addition to professional qualifications. Training can be delivered at one of Coventry University Group's campuses, in the workplace and via distance learning. Assignments are based on the apprentice's own work role. Apprenticeships can be used to upskill existing staff and train new recruits. We offer engineering, construction, science, health and social care, business and administration, legal and digital apprenticeships. | Coventry University Online |
| 25 | Learning Enhancement team HLS | The Learning Enhancement Team based within The Faculty of Health and Life Sciences have been exploring a range of technology to support student learning<br>• Immersive Community Communication (ICC) is a Virtual Reality resource that helps health care students develop a level of preparedness and understanding of professional communication and its emotional effect. The framework for ICC is now being adopted for use in other faculties that have communication modules.<br>Drones: CELE currently have two qualified pilots and are using drones for general video production and also as part of the Forensic Investigative Studies course. Additionally we are exploring Photogrammetry techniques using drones to create photo realistic 3D environments. • | Learning Enhancement team HLS |

| | | 2D Games: such as RPG Maker is being used to build learning environments for courses • Twine 2: is being used to present Scenarios | |
| 26 | National Institute of Coding | The £40m Institute of Coding (IoC) was announced in January 2018. It brings together universities, large corporates, SMEs, industry groups, experts in the delivery of distance and non-traditional learning and professional bodies, to develop and deliver innovative, industry-focused education across the UK. This unique collaboration is supported with £20m from the Office for Students, and match funding from universities and industry partners. The IoC will address an identified national shortage of digital skills, through increasing the quality and supporting the growth of digital skills provision at Levels 6 & 7, creating and promoting innovative learning and teaching models, and making a tangible, lasting impact on national digital skills provision. | Institute of Coding |
